# Instructions for the Participants of Electronic Exams on Linux

- Enter the information needed for the identification: Last and first name, and nethz login.

- You can change to a US keyboard layout by entering `setxkbmap us` in a terminal.

## Save your results exclusively to the folder `~/results`!

Only documents in that folder will backed up regularly and can be taken into account for the exam rating.

## Do not save ANY files into `~/resources`!

The contents of this folder can be refreshed anytime. Before copying the resource files, all files in this folder will be **deleted**.
In case of a restore after a reboot or switch to another computer, copy your files from the folder `~/restored-results` to the folder `~/results`. The folder containing the restored files will not be saved.

## In case of an error message:

Do not close error messages or windows if there is an error message on the screen. Raise your hand and inform the examinator.

## Report technical problems immediately.

Additional time will be calculated based on the time a problem has been reported.

## Report files overwritten IMMEDIATELY!

If you overwrite your own files by mistake, report IMMEDIATELY! Rename the corrupted file to prevent the backup process to fetch the wrong content.
